# BOSTON AND MAINE RAILROAD

---

The Annual Meeting of the Stockholders of BOSTON AND MAINE RAILROAD will be held on Wednesday, April 8, 1925, at ten o'clock in the forenoon, in the President's Room, 11 North Station, Boston, Massachusetts, for the following purposes:

- I. To hear and act upon the report of the Directors.
- II. To fix the number of Directors and to elect Directors for the ensuing year.
- III. To take such action as the stockholders may deem expedient with reference to authorizing the issue of bonds under and secured by the Company's present mortgage to Old Colony Trust Company, et al, dated December 1, 1919, for the purpose of purchasing, paying, retiring or refunding bonds of the Troy and Boston Railroad Company to the principal amount of \$573,000. referred to in said mortgage among the underlying bonds.
- IV. To take such action as the stockholders may deem expedient relative to the interest rate, date, maturity, series, form and any and all other matters, covenants and agreements relating to said proposed bonds and to the issue, delivery and disposal thereof, all in accordance with the law and as provided by the provisions of said mortgage.
- V. To take such action as the stockholders may deem expedient with reference to applications to the Interstate Commerce Commission and other governmental authorities or public tribunals in relation to the subject matter of any of the articles in this call or with reference to orders or decrees thereon.
- VI. To take such action as the stockholders may deem expedient with reference to the appointment of persons or corporations to countersign and authenticate bonds, notes or other evidences of indebtedness.
- VII. To take or authorize the officers of the corporation and its board of directors to take any action in relation to the foregoing articles that may be found necessary or expedient as incidental to or in furtherance of the purposes therein expressed or referred to.

By order of the Directors,

ARTHUR B. NICHOLS, *Clerk.*

Boston, Mass., March 10, 1925.

# NINETY-SECOND ANNUAL REPORT

---

*To the Stockholders of the Boston and Maine Railroad:*

**General Statement** The financial results for the year 1924 show a net income after fixed charges of \$1,772,737 as compared with a deficit of \$3,491,070 in 1923. This, in the face of a reduction in gross revenues of \$7,496,121, is very gratifying.

The improved showing was due in part to the much more favorable weather conditions in the early months of the year, and to the reduction in expense of maintaining equipment which, in 1923, was abnormally high as one of the results of the shopmen's strike. However, a reduction of \$6,860,269 in transportation expenses, which absorbed the greater part of the reduction in the gross revenues, and a reduction of \$2,386,998 in equipment rentals, indicate that the improved results could only have been accomplished through improved operating efficiency.

The ratios of the various groups of operating expenses to operating revenues were as follows:

	1924	1923
Maintenance of Way and Structures . . . . .	12.8	13.4
Maintenance of Equipment . . . . .	20.7	22.6
Traffic . . . . .	0.9	0.8
Transportation . . . . .	43.0	47.2
Miscellaneous . . . . .	0.3	0.3
General . . . . .	3.5	3.0
Total . . . . .	81.2	87.3

A reduction in gross revenues as compared with 1923 was not peculiar to the Boston and Maine, and was in part due to conditions which prevailed throughout the country. The restriction in output of manufactured products was particularly serious in many important industries of New England such as textiles, boots and shoes and hardware. The accumulation of substantial stocks of fuel, together with reduced consumption, resulted in a considerable falling off in the movement of bituminous coal. While the drop in passenger revenues was not as sharp as in freight revenue, this item was seriously affected both by the decline in general business and by the increased use of motor cars.

Further comment will be made under appropriate headings both as to certain details connected with the improved showing and also as to the decline in revenues.

The financial results for 1925 should be more favorable than for 1924, provided there is no disturbance in the present rate structure. The improvement is expected to come not only through a somewhat larger volume of business, but also through a continued improvement in operating performance.

The net revenues should also be favorably affected as a result of further increases in divisions of through rates obtained through negotiations with our western connections; by a more favorable contract with the Pullman Company negotiated during the past year; by the possibility of larger returns from express traffic through the operation of the present uniform contract; and by the efforts to further reduce the losses on unprofitable portions of the system.

**Discontinuance of Branch lines** During the year, efforts have been continued to relieve the Boston and Maine of certain portions of its line which have been operated at substantial losses. On July 23rd, 1924 the Interstate Commerce Commission authorized the discontinuance of the Orchard Beach Branch, in Maine, and this line, which is about 4 miles in length, has been sold to a local transportation company. On August 22nd, 1924 application was filed for authority to abandon the Nashua and Acton Railroad, extending from Nashua, N. H. to North Acton, Mass., a distance of 20 miles, and to discontinue the operation of the 4 miles between North Acton and Concord Junction used under a trackage agreement with the New Haven Railroad. Hearings on behalf of the Commission were held by the Massachusetts Department of Public Utilities on November 12th, 1924, and a decision is awaited.

As a result of studies which are being made of the operations of branch lines, the following additional applications have been filed and are now pending before the Interstate Commerce Commission.

<b>Massachusetts</b>	<b>Mileage</b>
Newburyport Branch.....	30
Lawrence Branch.....	15
South Reading Branch.....	8
Lines Near Tewksbury.....	9
Total in Massachusetts.....	62
<b>New Hampshire</b>	
North Weare Branch.....	23
Manchester and Milford Branch.....	18
New Boston Railroad.....	5
Portion of Keene Branch.....	30
Peterborough Railroad.....	11
Belmont Branch.....	4
Bethlehem Branch.....	3
Total in New Hampshire.....	94
Total.....	156

If all of these applications are granted, it is estimated that the net income will be increased over \$500,000 per annum. We reiterate our confidence in the integrity of the value of the property, and again point to the substantial excess of the valuation found by the Interstate Commerce Commission over both the property investment account and capitalization. If all of the lines were abandoned which are involved in applications now pending, the margin between the valuation and capitalization would still be substantial.

In view of the wide-spread publicity which has been given to this subject of abandonments, the Board deems it advisable to call attention to its position as announced on December 1st, 1924 in connection with the filing of certain of the applications now pending. This statement reads in part as follows:

"The filing of these applications is in line with the policy of the Boston and Maine to reduce its mileage of unprofitable lines to a reasonable proportion of its total mileage. It is planned to file other applications from time to time as conditions warrant, in accordance with a comprehensive program.

"While much of the unprofitable mileage of the Boston and Maine results from the fact that the system is a combination of many small roads constructed years ago for competitive reasons, the situation has been brought to a head by reason of the rapid development of the motor bus and motor truck, and the extensive program of highway construction and improvement.

"In following out its program for the elimination of unprofitable mileage, every effort is being made to avoid hardship to the communities served by these lines, and consideration is given to the practicability of serving these communities by motor transportation."

It is believed that in many instances the transportation which is now being performed on rails can be better and more economically performed by motor vehicles on the highways. For that reason the Boston & Maine Transportation Company has been incorporated to undertake highway motor service where the 'traffic' warrants, and other means of transportation are not available, in order that the discontinuance of such rail lines as may be authorized by the Interstate Commerce Commission may be accomplished with the least possible hardship to the communities affected. A beginning has been made through an application filed with the New Hampshire Public Service Commission on March 3, 1925, for authority to operate motor service in and about Portsmouth, N. H. It is intended that this service shall replace that afforded by the Portsmouth Electric Railway which has for many years been operated at a loss by the Boston and Maine.

**Motor Cars on Branch Lines** Early in 1924, the purchase was authorized of two types of gasolene rail motor cars, one a single unit car, the other a heavier type of car with trailer. The single unit car was received during the summer, was operated for a time on the Ashburnham Branch, and since September 28th has been in operation between Manchester, N. H. and Ayer, Mass. The heavier type of car has only recently been received. It is expected that this unit will be operated in main line service between North Adams and Troy.

The Boston and Maine has been following closely the experiments with various types of rail motor cars on other lines. In addition to the cars recently acquired, experiments were for some time conducted with a steam unit car, which was destroyed by fire late in 1923. It is believed that a certain number of these units can be used on lines which must be retained for freight service, and where the volume of passenger traffic is sufficient to justify the expense. In cases where freight traffic does not justify the maintenance of the track, it is believed that passenger traffic can be most economically handled by the highway bus, which is much less expensive both in first cost and in the expense of maintenance. This conclusion has been confirmed by results on the Ashburnham Branch on which both the steam and gasolene rail cars were used experimentally. While the economy was substantial as compared with steam operation, the revenue was insufficient to justify even this substitute service, and the short mileage made it impossible to realize the full measure of economy. Late in September 1924, a highway bus was substituted for the rail motor car, and has been operated successfully through the winter at substantially less expense.

**Motor Truck and Bus Situation** During the past year the management has continued to give active attention to the proper correlation of motor and rail service with the hope of bringing about an economic relationship which will avoid wasteful duplication of transportation agencies and result in benefit and convenience to the public. As stated in previous reports, all common carrier vehicles, both freight and passenger, should be subject to the same regulation — either interstate or intrastate — as steam and electric railroads, and a uniform system of taxation should be enacted for all public utilities. Existing conditions clearly discriminate against the steam and electric lines and favor the highway transportation companies.

The interurban competition of the common carrier passenger buses along the main line routes of the Railroad became so keen in 1924, particularly in Massachusetts where these vehicles are not subject to regulation or restriction by the Department of Public Utilities and where no certificate of exigency is required, that it seemed necessary for the Railroad to present its case to the various cities and towns where bus companies were applying for licenses to compete with the Railroad for its single trip passenger business.

Some cities and towns have declined to issue licenses to independent bus lines, recognizing that they were taking from the railroad the more profitable standard fare traffic, and that, deprived of this traffic, the railroad could not afford to continue low rate service for commuters. In some instances, where such bus companies continued to operate without licenses in violation of the law, legal proceedings were taken and are now pending.

**St. Johnsbury & Lake Champlain Railroad** The disposition of the St. Johnsbury and Lake Champlain Railroad, in Vermont, which has for many years been operated by the Boston and Maine, has long been a problem to the present management. This line has been unable to earn interest on its bonds guaranteed by the Boston and Maine, its operating costs have been high as a result of heavy grades and light traffic density, and its revenues have recently been affected by automobile competition. Effective January 1st, 1925 all representatives of the Boston and Maine withdrew from the Board of Directors and from the management of this line, direction was assumed by a Board of Directors consisting entirely of Vermont citizens who are interested in the communities and industries which depend upon this line for transportation, and the attempt is being made to operate the line at a minimum cost and to enlist the support of the localities served by it. It is an experiment with real possibilities and one which may well be watched with interest.

**Suncook Valley Railroad** A somewhat different condition existed in the case of the Suncook Valley Railroad in New Hampshire which had been operated under lease by the Boston and Maine. As the original lease had expired, the Boston and Maine had been operating this line for several years without rental under a short term lease which could be cancelled on thirty days' notice. The operation of the Suncook Valley had resulted in a substantial annual loss to the Boston and Maine, and as there seemed to be no prospect of eliminating this loss, the lease was terminated by proper notice, and the Suncook Valley Railroad took over the operation of its property on September 28th, 1924. An extension of this branch, about four miles in length, is owned by the Boston and Maine, and as this portion has always been operated in connection with the Suncook Valley, an agreement has been made to transfer the extension to the Suncook Valley Railroad Company when the approval of the interested commissions has

been obtained. Since September 28th, 1924 this line has been operated with a restricted service under local management, and the Boston and Maine has co-operated by leasing equipment, furnishing supplies and rendering other assistance without profit. This operation, under purely local management, like that of the St. Johnsbury and Lake Champlain, offers an opportunity for observation and study which may prove of value in the future consideration of similar problems.

**Financial Readjustment** The maturities of \$4,660,000 in 1925 (of which \$500,000 came due on February 2nd, \$3,660,000 are due May 1st, and \$500,000 September 1st) and the fact that the total maturities within the next five years amount to \$69,014,500 have resulted in the formation of a General Readjustment Committee representing substantial holdings of Boston and Maine securities. Your Directors were requested to appoint, and did appoint, a committee of four directors to co-operate with the General Readjustment Committee in the consideration of a plan of financial readjustment, and several conferences have been held.

As a result of these conferences, and in view of the prospect that a satisfactory plan of readjustment might be developed within the near future, the holders of \$500,000 of 3½% bonds which matured February 2nd, 1925 were requested to withhold presentation of their bonds for a short time. At the request of the Readjustment Committee your Board voted to pay interest on these bonds at the rate of 6% during this period.

A bondholders' committee has recently been formed, and conferences have been held between this committee and the General Readjustment Committee in the hope of developing a plan which might meet with the approval of all interests.

**Interest on Government Loans** Bills were introduced in both Houses of the recent Congress providing for a reduction in the rate of interest on loans made to railroads by the Government, from the present rate of 6% to a rate more nearly commensurate with the cost of money to the Government. The United States now holds securities of the Boston and Maine Railroad to the par value of \$48,685,479 which would have been directly or indirectly affected by the proposed legislation, and your President with officers of other interested carriers appeared before the Senate Committee on Interstate Commerce to urge the passage of this legislation. The Secretary of the Treasury also appeared personally before the Senate Committee to urge the fairness of the proposed bills, but the necessary action was not taken by Congress prior to adjournment. It is obviously inequitable and inconsistent for the Government to derive a substantial profit through loans to carriers which were intended to be helped through a period of unfavorable credit conditions by such loans. It is hoped that this situation will be corrected, and your management will use every effort to bring about such a result.

**Distribution of Stock** The total number of stockholders at the end of 1924 was 16,308, a reduction of 489 from December 31st, 1923.

<b>Changes in Funded Debt</b>	The Funded Debt on December 31, 1924, amounted to \$132,666,679, an increase of \$3,781,800 since December 31, 1923.		
<b>New Issues</b>	Series N 6% Bonds dated January 1, 1924, due January 1, 1929 . . . . .	\$1,106,000	
	Series O 6% Bonds dated January 1, 1924, due January 1, 1934 . . . . .	<u>5,894,000</u>	\$7,000,000
<b>Paid Off or Cancelled</b>	Troy and Boston 7% Bonds, dated July 1, 1874, due July 1, 1924 . . . . .	\$573,000	
	Boston and Maine 6% Series D Bonds, held in Sinking Fund now closed, delivered to Treasurer and cancelled . . . . .	1,929,000	
	Equipment Trust of 1920, 6% Gold Notes due January 15, 1924 . . . . .	454,200	
	Equipment Trust of 1922, 5½% Gold Certificates due August 1, 1924 . . . . .	121,000	
	Equipment Trust No. 3, 6% Gold Certificates, due June 1, 1924 . . . . .	<u>141,000</u>	<u>3,218,200</u>
	Increase as above . . . . .		\$3,781,800

**Valuation** Proceedings have been continued before the Interstate Commerce Commission in the effort to prove that the tentative valuation placed on the property should be substantially increased. The submission has not as yet been completed. The expenditure by the Boston and Maine Railroad System up to December 31st, 1924, in preparing and furnishing data and continuing records and reports as called for by the Commission itself or its Bureau of Valuation, has amounted to \$1,305,984.15.

The tentative valuation of the System adjusted to December 31, 1923 is \$288,316,071 as compared with a property investment figure of \$262,315,354 and an outstanding capitalization of \$224,762,360.

**Sale of Real Estate** The policy of selling real estate not needed for railroad purposes, which was established after the termination of the receivership in 1919, has been continued. Receipts for the past five years have been approximately as follows:

1920 . . . . .	\$225,000
1921 . . . . .	200,000
1922 . . . . .	475,000
1923 . . . . .	596,000
1924 . . . . .	<u>680,000</u>

an aggregate of about . . . . . \$2,176,000

In addition to the sales for 1924, an agreement has been entered into with the Ford Motor Company in relation to the sale of about 31 acres of land on Middlesex Avenue at East Somerville, upon which that Company contemplates the erection of a new plant.

**Taxation** The total tax accruals for the year 1924 amounted to \$3,040,801.65, the increase of \$109,842.49 over the previous year being largely due to adjustments covering a period of several years. Efforts are constantly being made to prevent the increase in this item and to accomplish reductions wherever possible.

The contention of the Boston and Maine that the returns of its leased and operated lines should be consolidated for the purpose of Federal taxation has been partially recognized by the Income Tax Department which has permitted a limited grouping of lines, resulting in a saving of approximately \$161,000 for the years 1917 to 1923. The question as to whether a complete grouping can be accomplished is now pending before the Board of Tax Appeals.

In state taxation, the activity this year has largely centered upon the effort of the Boston and Maine and other Maine railroads to prevail upon the Legislature of the State of Maine to introduce into the law the factor of net earnings to regulate the rate of taxation on the gross receipts. At present, Maine taxes are based on gross receipts without respect to the ability of the roads to pay as indicated by net income. A hearing has been held by a Committee on Taxation of the Maine Legislature at which the railroads presented their case, but this Committee has not yet made its report. Favorable action by the Legislature would mean a considerable reduction of the taxes paid by the Boston and Maine to the State of Maine.

In New Hampshire, the State Tax Commission has reduced the gross valuation of the Boston and Maine and its leased lines by \$1,000,000.

In Vermont, there was no increase of taxation on the Boston and Maine or on its leased and operated lines, and in the case of the Montpelier and Wells River Railroad the valuation was diminished by \$250,000. It is significant that the appraisal upon the St. Johnsbury and Lake Champlain Railroad Company for the year 1925 was diminished from \$1,224,000 to \$600,000, thus indicating that the State has recognized the necessity of aiding that road under its new Vermont management.

**Wells River Bridge** Upon petition, filed in the Superior Court, Grafton County, New Hampshire, on February 1st, 1924, for the dissolution of Proprietors of Wells River Bridge, of which the Boston and Maine Railroad was sole stockholder, the Court issued a decree dissolving the corporation. The decree of dissolution was filed in the office of the Secretary of State of New Hampshire on June 28th, 1924 and on that date the existence of the corporation, which was chartered in 1803, was terminated.

It had long maintained a toll bridge over the Connecticut River from Haverhill, New Hampshire, to Newbury, Vermont. The opening of the free bridge between these two towns did away with the need of the toll bridge and with the usefulness of the franchise under which it had been maintained.

**Traffic Conditions** Gross Freight and Passenger revenue for the year 1924 was disappointing but the decline was due to conditions beyond the control of the Railroad. The gross revenue of most of the carriers throughout the country shows a decrease in 1924 as compared with 1923, resulting from a general falling off in practically all lines of industry.

As to freight, merchants and manufacturers generally found it desirable to reduce stocks on hand and purchases were made in small quantities. In order to meet trade requirements, these smaller lots moved to a considerable extent in express or other service instead of by the usual transportation method of larger lots in freight service. This was particularly true in the movement of New England's manufactured products, such as boots and shoes, textiles, hardware, etc. Other factors affecting the volume of freight traffic were of general application.

The decline in general business, coupled with increased motor competition, resulted in a falling off in total passenger revenue. The records show a substantial decrease in both local and interline ticket sales, the rate levels of which remained stationary throughout the year, but the increased commutation rates authorized by the various Commissions in the early part of the year brought a slight increase in revenue from that form of ticket. The result of such increased rates fell short of anticipations, but a review of the details of all classes of passenger traffic shows that the decline in commutation travel was not materially greater than other local passenger traffic. The decrease in interline ticket sales was very much less than the falling off in the sales of local tickets, indicating the greater effect of automobile competition on the short haul traffic.

While we cannot reasonably expect a sudden or great advance in traffic revenue in 1925, the new year opens with a general note of optimism and it is hoped that the revenue will show an improvement over that of 1924.

**New Industries** The outstanding feature of 1924 from a traffic standpoint was the success of the Company in bringing to its lines the immense assembly plant projected by the Ford Company at East Somerville. The proposed plant involves an expenditure of approximately \$4,000,000, and contemplates employment for upwards of 2,500 persons with an estimated production of 500 automobiles per day. This is the largest single enterprise to locate on our lines in recent years and we anticipate a material increase in revenue from the transportation of this industry's raw material and finished products.

**Agencies** The results from the establishment of traffic agencies at Chicago, Detroit, Pittsburgh and Portland have been so satisfactory that during the past year additional agencies were opened in New York City, Kansas City, Memphis and Cleveland.

**Divisions of Freight Rates** Further hearings in I. C. C. Docket No. 11756, known as the "New England Divisions Case," and referred to in previous Annual Reports, have been held during the past year. Interested New England lines have presented a new petition to the Interstate Commerce Commission seeking increases in their proportions of joint freight rates beyond those previously awarded, and at the same time they have requested the Commission to broaden the scope of its order so as to include divisions of coal rates. The New England lines have also defended their divisions against complaints brought by the Erie Railroad, the Central Railroad of New Jersey and the Delaware and Hudson Company. Presentation of testimony, in which the Boston and Maine actively participated, has been completed.

Meanwhile much progress has been accomplished during the year by the Boston and Maine in reaching adjustment with its connections by negotiation. During the early spring an agreement was reached by the Traffic Department, effective as of January 1, 1924, with the Canadian National Railways, resulting in a material increase in Boston and Maine proportions on all traffic from and to stations on the Grand Trunk Lines West, including Chicago and Milwaukee. On July 1, 1924, arrangements were accomplished for an increase in divisions on Canadian Pacific Railway traffic between stations on the Boston and Maine and stations on the Wabash Railroad between Detroit and Chicago, both inclusive, when routed via Newport, Vt.

Effective November 1, 1924, an agreement was reached with the New York Central Lines resulting in a material increase in Boston and Maine proportions on traffic moving between its stations and points on the New York Central System via Rotterdam Jet. and Troy, N. Y., as a consequence of which the Boston and Maine has withdrawn its claim against the New York Central Lines for an increase in merchandise divisions.

The Traffic Department will progress as rapidly as possible new divisions with other connections during 1925, and at the same time an effort will be made to simplify the bases of settlement of joint revenue so as to reduce the accounting expense to the lowest practicable minimum.

**Freight Rate Situation** No general changes in the freight rate structure were made during the past year. We are continuing the policy of cancelling unnecessary commodity rates and a few specific rates have been reduced whenever it has been found necessary to do so to enable New England industries to successfully market their products in competition with other sections of the country.

On May 13, 1924, the Interstate Commerce Commission, on their own motion, entered an order known as I. C. C. Docket No. 15879, Eastern Class Rate Investigation. The class rate structures within New England territory and within Central Freight Association territory were fixed by the Commission some years ago and the purpose of this investigation, which involves probably the most important rate case in the recent history of the Commission, is to remove inconsistencies in class rate scales between Trunk Line and Central Freight Association and New England territories as well as within Trunk Line territory.

**Port Differential Case** Early in 1922 the Maritime Association of the Boston Chamber of Commerce, acting in conjunction with railroad, steamship, industrial and commercial organizations interested in import and export traffic moving through Boston and other New England ports, filed a complaint with the Interstate Commerce Commission for the purpose of securing import and export rates not higher than those in effect from and to other Atlantic Ports. Presentation of the case was completed during the latter part of 1922, and a decision was rendered by the Interstate Commerce Commission February 3, 1925, dismissing the complaint. The Commission, however, expressed the opinion that the carriers should take steps to equalize the charges on grain and grain products from points west of the Mississippi River and on ex-lake grain from Buffalo moving to North Atlantic Ports for export. If this is accomplished the result should be favorable to the export traffic of the Boston and Maine.

**Railway Mail Pay** As stated in the last annual report, the Interstate Commerce Commission in December, 1923 awarded to the New England roads an increase in rates of mail pay approximating 35%. This decision was estimated to yield the Boston and Maine approximately \$300,000 per year, and the estimate has been confirmed by returns during 1924. In its report of December 13th, 1923 the Commission declined to make the increase retroactive, but upon reconsideration, the Commission on January 12 of this year found the increased rates reasonable from February 25th, 1921.

**Pullman Surchage** During the year, the Interstate Commerce Commission held a series of hearings on a petition seeking abolition of the Pullman surcharge. The Commission's recent finding was in favor of the reasonableness of the surcharge, which was a fortunate result for the Boston and Maine and other railroads with a large passenger traffic. After the finding the matter was taken to Congress by the opponents of the surcharge, and the Senate attempted to override the Commission's conclusion, but the House declined to take similar action.

**Pullman Contract** During the past year a new contract has been entered into between the Boston and Maine Railroad and the Pullman Company. Pullman sleeping car facilities will be furnished by the Pullman Company on a basis uniform with that adopted by a majority of other lines operating Pullman service, and a special agreement has been arranged to meet Pullman parlor car requirements. Application of the new arrangement to the previous year's mileage shows that the contracts will result in a material reduction in payments to the Pullman Company. The Boston and Maine will continue to furnish sleeping and parlor car equipment on lines where the patronage justifies such service; on the other hand an effort will be made to eliminate service which proves not to be reasonably remunerative.

**Interchangeable Mileage Scrip Books** In the last Annual Report it was stated that petitioners for reduced fares had succeeded in securing a reopening of the interchangeable mileage book case. Hearings have been held before the Interstate Commerce Commission and a decision will probably be announced during the year 1925. This Company has joined with other interested lines in submitting to the Commission such facts as we believe demonstrate that a reduction is neither warranted nor necessary.

**Washington-Montreal Passenger Service** First-class passenger trains between Washington, D. C., and Montreal, P. Q., were established in June, 1924. The northbound train, known as the "Montrealer," commenced service June 15th and the southbound train, designated as the "Washingtonian," was inaugurated the following day. These trains operate over the Pennsylvania Railroad, New York, New Haven & Hartford Railroad, Boston and Maine Railroad, Central Vermont Railway, and Canadian National Railways. The equipment consists of Club cars, Sleeping and Parlor cars, Coaches, Smoking and Mail cars, and Dining car service. There is considerable travel between Washington, Baltimore, Wilmington, Philadelphia and Trenton, on the one hand, and Montreal, Ottawa, Quebec and intermediate stops on the other. Attractive connections are made at each terminal with other lines and good service is maintained to and from New York City. During the winter season through Sleeping car service is maintained on these trains between Quebec and Florida. Both of these trains have been well patronized from their commencement and it is confidently expected that their popularity will increase during the coming year.

**Advertising in Stations and Cars** During the calendar year 1924 the net receipts of the Boston and Maine Railroad from the contract with the George W. Roebing Advertising Service, Inc., amounted to \$73,572.35 as compared with \$58,859.54 during the year 1923, equivalent to an increase of approximately 25%. This contract has been in effect since early in 1922 with a total net return to the railroad up to December 31, 1924, of \$151,422.34.

**Operating Performances** Improvement in operating performance has been particularly satisfactory in view of the handicap resulting from reduction in operating revenues, which in 1924 were 8.7% less than in the previous year, a larger decrease from one year to another than had occurred during a period of more than twenty years, with the exception of the drop from the high point of 1920 to 1921, when the reduction in revenues amounted to 9.6%. Revenue freight tonnage decreased about 12% from previous year, the principal reduction being in the item of coal which fell off about 24%. The reduction in passenger miles amounted to 11% from 1923 and the total of 772,430,240 was 24% below the peak reached in 1920. Passenger traffic in 1924 was less than in any year since 1907.

In the face of this reduction in traffic, the operating ratio was reduced from 87.31% in 1923 to 81.21% in 1924, a lower ratio than in any year since 1917. Total expenses were reduced 15.1%.

The cost of fuel in 1924 absorbed only 9.3% of operating revenues as compared with 12.2% in 1923. The cost per ton had decreased about 11% from the previous year, and the consumption unit as related to service performed was less than it had been for several years.

The average number of freight cars on the line during the year 1924 was less than in any other year during a period of more than 17 years. This was accomplished partly through the speeding up of the car movement, the average miles per car day in 1924 being exceeded by only two years during a 17-year period. The decrease in freight traffic and the improved weather conditions contributed materially to the reduction in cars on the line as compared with 1923 and to the substantial reduction in per diem charges paid foreign roads.

Engine failures in the last quarter of 1924 were lower than in any corresponding period during the past ten years. The number of wrecks and derailments in 1924 were 44% less than in 1923, and the operating expense charged to "clearing wrecks" was \$62,002 in 1924 as against \$131,670 in 1923.

Operating expenses are more and more reflecting the result of capital expenditures during recent years. In 1920 there were purchased 20 Santa Fe locomotives for use on the Berkshire Division, and 10 additional locomotives of the same type were purchased in 1923. In connection with the purchase of these locomotives, the bridges on this division were strengthened to permit of their use. In 1923 some of the bridges between Concord, N. H. and White River Junction, N. H. on the Southern Division, were reinforced to permit the operation of heavier locomotives. The result of these expenditures is indicated by a comparison of the gross train load in 1924 with that of 1920 which shows an increase of about 38% on the Berkshire Division, and about 7% on the entire Southern Division, with an increase of about 4% on the remainder of the System.

**Discontinuance of Agencies and Other Operating Economies** During 1924 because of decline and change in method of handling business, we have been able to discontinue or consolidate agencies at twenty-five points on the system, resulting in very substantial savings.

So-called Fanfold Billing Machines have been installed at eighteen freight stations, which has resulted in a further substantial saving, as well as in more efficient handling of the business.

Automatic audible and visible signals have been installed at 48 crossings at grade, resulting in considerable payroll saving.

Double platforms have been installed at ten stations, permitting discontinuance of crossing tenders, with consequent payroll saving. Train service employees flag their own trains over such crossings.

In the latter part of 1924 the yard at Greenfield, Mass., was closed for through traffic, and the business formerly handled in this yard is now handled at East Deerfield; this will result in further savings in operating expenses.

**Creation of Bureau of Operating Statistics** On October 1, 1924, a Bureau of Operating Statistics was created, to which were transferred certain employees in other offices engaged in compiling or analyzing operating statistics. The purpose of placing such work in one office was to obtain closer supervision and co-ordination, to avoid or reduce to a minimum duplication of effort in the preparation or presentation of statistics, and to stimulate the proper and effective use of operating statistics.

The work is progressing in line with this program. Considerable time has been devoted to the investigation of the accuracy of the basic figures; several related statements have been combined in modified form; and other similar changes are under consideration.

**Relation with Employees** The shopmen's strike of July 1, 1922, was declared off on the Boston and Maine Railroad on April 7, 1924. No settlement was negotiated and no promises were made on the part of the management, which had maintained from the first the position stated in the annual report for 1922. Costly and unwarranted as was this strike, the results now obtaining justify the position which your management felt compelled to take when the issue was forced upon it. The efficiency and the quality of the work, as well as the output per man, are today at a higher point than for many years. A continuous improvement in these respects is confidently expected.

The war's aftermath has presented many problems, but none more important or far reaching than that of a readjustment to normal conditions between men and managements, particularly in the railroad service. Railroad managements generally have recognized this and each has been working in its own way to bring about an improved relationship and a better understanding.

Your management fully recognizes the importance of due consideration of the human element in the working relations among both supervisory officials and employees. It would fail in its duty alike to the property, to the public and to its own organization if it were to regard the building up of an effective co-operation as of less consequence than the technical problems of operation, maintenance and finance. Urgent as these problems are, under all circumstances, it remains permanently true that the labor and supervision cost is the largest item in the budget, and justifies, for this reason alone if on no broader grounds, special attention to the proper basis for a service distinguished by voluntary interest and good will rather than a mere perfunctory discharge of assigned duties.

There is ample evidence that this sense of common interest does exist among our forces at the present time in a marked degree. Questions inevitably arise, requiring adjustment through the usual channels provided, but the management has endeavored to observe both the spirit and the letter of its agreements with employees of the company, whether as individuals or as represented by their authorized spokesmen.

Educational work of a practical nature has been extended during the year, as opportunity would permit. The foremen's clubs in the Mechanical Department, organized last year at several points, have been extended over the system and are discussing problems of proper supervision as well as of shop practices, with increased attendance and interest. At Boston and Lowell classes in locomotive study have been organized by groups of men in engine and shop service, under the direction of a competent instructor from the Massachusetts Institute of Technology.

The semi-annual joint divisional meetings of the safety, fuel conservation and freight claim prevention committees, inaugurated last year, are proving of exceptional value, promoting a wider personal acquaintance and stimulating interest in the local work of the committees themselves. The work at several of our railroad Y.M.C.A. branches includes an increasing variety of instructive and recreational features. We are seriously handicapped at Boston, however, by the lack of adequate accommodations adjacent to the Terminal, in spite of which the membership is the third largest of any railroad branch in the country.

The Employees Magazine, published monthly since April 1924, has aroused very general interest, necessitating an increased edition. It is for the most part the work of men in our own service on all parts of the system, and has developed a large number of practical suggestions in the interest of economy and efficiency. There is ample evidence that it is contributing materially to a better understanding of the problems of the railroad and of the mutual responsibilities of both supervisors and employees.

The management has furthered these developments in recognition of its share of responsibility for relations of confidence and mutual interest throughout the service, conducive to efficient and dependable operation.

**Wage Adjustments** Following action of many of the eastern railroads, increases in wages were granted engineers, firemen, conductors and trainmen, effective from May, 1924. The increase, on a percentage basis, was from 4% to 8%. At the same time certain rules were changed by agreement with a view to more economical operation.

**Pensions** The payments for the year to pensioned officers and employees amounted to \$221,964.89. There were added to the roll during the year 104 names, and there were removed on account of death 53 names, leaving the number of pensioners 497, as of December 31, 1924, the average age of the persons on the roll being 73 years, 4 months, and the average monthly pension \$40.71.

**Automatic Train Control** It was stated in the last Report that the Railroad had been ordered by the Interstate Commerce Commission to install automatic train-control devices on the main lines between Boston and Greenfield, and Boston and Portland. The order as to the latter portion of line has since been changed to cover the line between Greenfield and Troy, so that the two orders now embrace the 190 miles of line between Boston and Troy comprising the main lines of the Fitchburg and Berkshire Divisions.

The time for carrying out the first order — i. e. that covering the line between Boston and Greenfield — has been extended by the Commission to July 1, 1925. In the meantime a trial installation covering about 14 miles of double track between Waltham and South Acton, Mass., has been completed at a cost of about \$45,000 and is now in operation.

Compliance with the order embracing the line between Greenfield and Troy is required before February 1, 1926.

The estimated cost of carrying out both orders is \$1,500,000, and the Railroad has petitioned the Commission for further extension of the effective dates.

**Additions and Betterments** During the year there was charged for additions and betterments an amount of \$2,445,667.27, which, after credits for land sold and equipment and property retired, was reduced to \$759,776.89, as shown in table No. 8.

Aside from betterments to equipment, the principal projects were the construction of new bridges at Boston, Greenfield, Mass., Lebanon, N. H., Gorham, N. H., Passumpsic, Vt., St. Johnsbury, Vt., and Orleans, Vt.; paving public delivery yards at Worcester; new station and freight house at Canaan, N. H.; new power plant at the engine house, Worcester; rebuilding and enlarging the engine house at Springfield; and wheel and axle machinery in the car shop at East Fitchburg.

Improvements to equipment include the superheating of 35 locomotives, application of steel ends to 490 freight cars, metal roofs to 525 freight cars and the renewal of steel floors on 232 gondola cars. In passenger equipment, 89 cars were equipped with steel underframes and 29 with steel center sills. In addition, 2 suburban trains were equipped with electric lights operated from the engine generator. This method is much less expensive than individual axle equipment, and the experimental installations have given satisfactory results.

**Wood Preserving Plant** Treatment of cross ties at the Wood Preserving Plant at Nashua was begun in April, 1924 and approximately 550,000 ties were treated. In addition, certain bridge ties and timber were treated, and it is expected to extend the treatment of this class of timber. The Nashua plant is operated by the New England Wood Preserving Company. In addition to railroad work it is undertaking commercial treatment which is resulting in increased freight revenue to the Boston and Maine.

**Rapid Transit in Boston District** Under Chapter No. 399 of the Massachusetts Acts for 1923, a Division of Metropolitan Planning was established.

Among other things which this Division has been investigating is the possibility of an extension of rapid transit service through Somerville and Cambridge by extending the present elevated structure, now ending at Lechmere Square, through Somerville and Cambridge to Massachusetts Avenue, North Cambridge. A tentative plan proposes to occupy land of the Boston and Maine Railroad along Lechmere Square, to utilize part of the right-of-way of the Boston and Maine Railroad between Prospect Hill and Somerville Junction and to take over the entire right-of-way between Somerville Junction and Massachusetts Avenue, North Cambridge, thus abolishing the present passenger stations at East Cambridge, Prospect Hill, Winter Hill, Somerville Highlands and West Somerville and probably North Cambridge.

This plan would require also the re-routing of the present service on the Lexington Branch and Central Massachusetts so that traffic on these branches would reach Boston over the Fitchburg Division.

While there have been some informal discussions between railroad representatives and the Division of Metropolitan Planning the management of the Boston and Maine is not committed to the tentative plans. A preliminary report has been made to the Legislature and a final report is expected soon.

This Division is also investigating the extension of rapid transit service into Malden by the use of the present Saugus Branch of the Boston and Maine Railroad, but in view of the apparent difficulties encountered the Division has asked for and received permission from the Legislature to extend this study for another year.

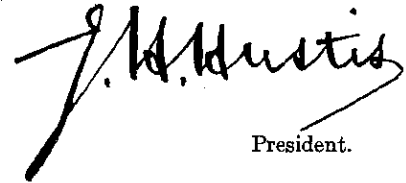

**Resignation of** Woodward Hudson, Esq., Vice-President and General Counsel, has resigned, effective March 31, 1925. **Mr. Hudson** 1925. Mr. Hudson came to the property on January 1, 1916, in the position from which he now retires. From June 10, 1918, to December 19, 1919, during the Federal Control period, he served as President. In both of these positions Mr. Hudson has rendered valuable service, for which the Board desires to place on record its appreciation.

ARTHUR BATEMAN CORTHELL, for 13 years Chief Engineer, died on May 24, 1924.

GEORGE HOWLAND FOLGER, Assistant General Superintendent, died on May 13, 1924, after 42 years' service with the Boston and Maine.

**Recognition** The Board of Directors desires to express its appreciation of the faithful service rendered by the officers and employees of the Company. Without their co-operation the improved results of the past year would not have been possible.

By authority of the Board of Directors,

President.

March 10, 1925.

## No. 5 OPERATING EXPENSES

YEAR ENDED DECEMBER 31, 1924 COMPARED WITH PREVIOUS YEAR

	Year ended December 31, 1924	Year ended December 31, 1923	Increase	Decrease
<b>MAINTENANCE OF WAY AND STRUCTURES</b>				
Superintendence.....	\$636,134 05	\$677,538 14		\$41,404 09
Roadway Maintenance.....	587,182 92	730,739 24		143,556 32
Tunnels and Subways.....	12,928 83	21,192 33		8,263 50
Bridges, Trestles and Culverts.....	526,731 97	631,169 28		104,437 31
Ties.....	1,602,325 89	1,525,701 46	\$76,624 43	
Rails.....	479,844 70	526,932 27		47,087 57
Other Track Material.....	562,965 97	532,335 22	30,630 75	
Ballast.....	<i>Cr. 3,827 59</i>	1,042 59		4,870 18
Track Laying and Surfacing.....	2,330,928 97	2,781,521 13		450,592 16
Right-of-Way Fences.....	80,704 71	78,937 67	1,767 04	
Snow and Sand Fences and Snowsheds.....	1,271 82	1,565 42		293 60
Crossings and Signs.....	368,402 53	377,461 20		9,058 67
Station and Office Buildings.....	540,420 82	575,816 98		35,396 16
Roadway Buildings.....	39,804 45	33,620 32	6,184 13	
Water Stations.....	91,093 42	101,718 16		10,624 74
Fuel Stations.....	70,376 36	84,284 73		13,908 37
Shops and Enginehouses.....	339,271 87	291,517 12	47,754 75	
Grain Elevators.....	25,299 54	34,925 65		9,626 11
Storage Warehouses.....	893 00	1,076 54		183 54
Wharves and Docks.....	38,621 13	18,768 77	19,852 36	
Coal and Ore Wharves.....	12,936 60	11,467 77	1,468 83	
Gas Producing Plants.....	12,091 99	9,980 12	2,111 87	
Telegraph and Telephone Lines.....	102,483 79	89,768 29	12,715 50	
Signals and Interlockers.....	591,758 69	703,067 03		111,308 34
Power Plant Dams, Canals and Pipe Lines.....	78 02	1,482 08		1,404 06
Power Plant Buildings.....	3,766 66	3,003 84	762 82	
Power Substation Buildings.....	38 35	<i>Cr. 320 02</i>	358 37	
Power Transmission Systems.....	3,187 52	5,927 46		2,739 94
Power Distribution Systems.....	36,141 76	26,967 34	9,174 42	
Power Line Poles and Fixtures.....	5,036 93	1,398 01	3,638 92	
Miscellaneous Structures.....	18,819 36	10,887 63	7,931 73	
Paving.....	26 82	90 31		63 49
Roadway Machines.....	61,188 09	56,302 37	4,885 72	
Small Tools and Supplies.....	120,230 38	148,743 99		28,513 61
Removing Snow, Ice and Sand.....	411,174 89	1,114,812 57		703,637 68
Assessments for Public Improvements.....	1,566 26	311 66	1,254 60	
Injuries to Persons.....	50,417 82	58,937 20		8,519 38
Insurance.....	118,272 48	108,195 54	10,076 94	
Stationery and Printing.....	5,860 68	10,491 74		4,631 06
Other Expenses.....	7 53	634 36		626 83
Maintaining Joint Tracks, Yards and Other Facilities— <i>Dr.</i> .....	309,457 57	287,228 41	22,229 16

NOTE.—The mortgage indenture dated Dec. 1, 1919, securing the Mortgage Bonds of Boston and Maine Railroad, also secures on equal terms all other bonds, issued or assumed by the Boston and Maine Railroad referred to in the Mortgage as "Pre-existing Bonds," except that bonds issued or assumed by the Boston and Maine Railroad described as First Mortgage Bonds are prior liens upon separate parts of the property as fully described in the Mortgage. Upon request of the holder and presentation of any pre-existing bond at the office of the Old Colony Trust Company, Boston, the Railroad will print or stamp upon it a statement that it is secured by the Mortgage Indenture dated Dec. 1, 1919.

No. 12  
INVENTORY OF EQUIPMENT

DESCRIPTION	December 31, 1924 <i>(See Note)</i>	December 31, 1923 <i>(See Note)</i>
<b>LOCOMOTIVES</b>		
Freight.....	450	454
Passenger.....	375	390
Switching.....	256	256
Electric.....	7	7
<i>Total</i> .....	1,088	1,107
<i>Total Tractive Power of Steam Locomotives (pounds)</i> .....	31,416,950	31,694,352
<i>Average Tractive Power per Steam Locomotive (pounds)</i> .....	29,063	28,813
<i>Locomotives Equipped with Superheaters</i> .....	426	391
<b>PASSENGER CAR EQUIPMENT</b>		
Coaches.....	1,112	1,125
Combination Passenger Cars.....	222	229
Other Combination Cars.....	51	51
Dining Cars.....	12	12
Baggage and Express Cars.....	297	300
Postal Cars.....	14	15
Other Passenger-Train Cars.....	96	114
<i>Total</i> .....	*1,804	*1,846
<b>FREIGHT CAR EQUIPMENT</b>		
Box Cars.....	11,192	11,635
Flat Cars.....	764	778
Stock Cars.....	49	56
Coal and Coke Cars.....	6,022	6,492
Refrigerator Cars.....	392	407
Caboose Cars.....	411	416
Other Freight-Train Cars.....	9	23
<i>Total</i> .....	18,839	19,807
<i>Aggregate Capacity of Cars in Freight Service (tons of 2,000 lbs.)</i> .....	634,031	660,776
<i>Average Carrying Capacity per Freight Car</i> .....	34.4	34.1
<b>COMPANY SERVICE EQUIPMENT</b>		
Officers' and Pay Cars.....	11	10
Ballast Cars.....	100	100
Derrick Cars.....	23	23
Steam Shovels.....	8	9
Wrecking Cars.....	92	93
Other Company Service Cars.....	1,011	1,115
<i>Total</i> .....	1,245	1,350
<i>Total, All Classes of Cars</i> .....	21,888	23,003
<b>ELECTRIC RAILWAY EQUIPMENT</b>		
Passenger Cars.....	55	56
Snow Plows.....	7	7
Other Cars.....	6	6
<i>Total</i> .....	68	69
Equipment assigned to The St. Johnsbury and Lake Champlain R.R. Co. (Included above)		
Locomotives.....	12	12
Passenger-Train Cars.....	13	13
Freight-Train Cars.....	4	4
Company Service Cars.....	9	9
<i>Total</i> .....	26	26

NOTE.—Includes 30 freight, 10 passenger and 24 switching locomotives, 65 coaches, 20 smoking cars, 8 combination baggage and smoking cars, 5 baggage and mail cars, 25 milk cars, 1,599 coal cars, 493 box cars, 200 refrigerator cars and 300 flat cars purchased under Equipment Trust Agreements.  
\*Includes 10 Passenger and 4 Baggage Cars in service between Boston and Montreal, 68.33 per cent of which are owned by this Company; also 8 Passenger and 4 Baggage Cars, 24.83 per cent of which are owned by this Company, and 1 Passenger Car, 31.02 per cent of which is owned by this Company, in service between Boston and St. John, N. B.

OLD COLONY TRUST CO.

WARREN G. LAWSON,

Assistant Trust Officer.

Boston, Mass., December 31, 1924.

This fund was closed out as of March 1, 1924, and the bonds and cash held by the Trustee delivered to the Treasurer of the Boston and Maine Railroad. The bonds have been cancelled and outstanding funded debt reduced accordingly.
